

KIMMELL'S

ANALYSIS

OF

PIONEER

GOLD

KIMMELL'S ANALYSIS OF PIONEER GOLD

INTRODUCTION

Gold coins issues from territories soon destined to become American States are among the most treasured branches of numismatics. These are called PRIVATE, TERRITORIAL or PIONEER gold coins.

Consider for a moment the armed robbery of Willis duPont's home in Miami, Florida in 1967. Millions of dollars worth of very rare coins were stolen, however, only 16 coins were negotiated for, and ransomed back for a reported \$50,000 in cash. (April 1968 NUMISMATIC SCRAPBOOK, page 661.) These were undoubtedly the most prized coins in Mr. duPont's collection. All 16 were Territorial gold coins!

The nearly complete set of United States gold coins in the Josiah K. Lilly collection was matched in desirability and rarity by the equally nearly complete set of Pioneer gold coins. Both parts of his collection now repose in the Smithsonian Institutions' Museum of History and Technology, and are off the coin market forever.

Other great collectors, such as Louis Eliasberg (owning the only complete collection of regularly issued U. S. coins), Amon Carter, Jr. and many others hold their territorials in very high esteem.

Knowledgeable dealers like John Ford of the New Netherlands Coin Co., Art and Don Kagin and E. A. Parker continue to discover new types and unravel long forgotten mysteries relating to pioneer gold coins. Ford researching the FIVE D. MASSACHUSETTS AND CALIFORNIA CO. coin found spurious pieces with the denomination stamped 5 DOLLARS, and also five \$20 1853 UNITED STATES ASSAY OFFICE OF GOLD 900 Thous., although

varying in actual finenesses, in PROOF condition. Art Kagin discovered unique reverses on \$50 gold slugs and Parker found the unique 1850 \$5 NORRIS GRIEG NORRIS struck in STOCKTON.

There are two sets of territorial gold coins that are exceptionally interesting and in a unique category by themselves. They are stamped with the name of the UNITED STATES OF AMERICA on each coin under the authority of the U. S. Treasury Dept. These are the AUGUSTUS HUMBERT and THE UNITED STATES ASSAY OFFICE OF GOLD (USAOG). Your writer and many others (see Kosoff's fine article "FOUND - THE LOST U. S. COIN TYPE" in the April 1968 COINage magazine) believe that they should be included in the regular U. S. coinage under the U. S. Provisional Mint Gold.

We will not go into the history of the companies that struck pioneer coins to any great degree. The GUIDEBOOK covers this very well and additional study is available in Adam's fine book incidentally now out in a reprint. Coins are listed in the order that the GUIDEBOOK uses.

We will now analyze the coins as they appear in auction sale records and the more famous collections to establish a pattern of the rarity scale and availability of all territorials.

Coin in the Clifford-Kagin and Beck collections should be added to this list as they appear on the market.

During the past fifteen years, after scanning several thousand coin auction and mail bid sales, approximately two hundred and fifty have been found containing pioneer gold coins. This list is included preceding the analysis of the coins, followed by the GUIDEBOOK order of listing of the coins for the convenience of the reader. These are

found starting on page 215 of the GUIDEBOOK.

Some Pioneer types sell at high prices compared to others much rarer. These are not necessarily overpriced, but many extremely rare private gold pieces are undervalued, and some unbelievably so. This series has many possibilities and our prudent and discerning readers may uncover greatly undervalued rarities.

The BRASHER DOUBLOON of 1787 is not included in this list although it is a privately minted gold coin. No catalog records have been found on it.

The private gold coin data has been compiled from the following
auction and mail bid catalogs:

- 1878 Clemens
- 1882 Bushnell
- 1883 Scotts
- 1884 Curtis, Dietrich, Frossard, Leavitt and Levick
- 1885 Randall, Scott #25 and Haseltine Smith

This list comprises most of the important sales. Future findings
containing rarer pieces will be added later as a supplement.

The same coin may appear in two or more sales. When known, they will be treated as one listing.
